

Dear partner

CMS Dental is introducing a new product root n' screw **brush**™

- a small **perio rotary brush** to be used as supplement to SRP

Developed with the assistance of Dr. Claudio Mongardini, Periodontist in private practice and at La Sapienza University, Italy.

- Effective cleaning in furcations and large open pockets
- Cleans root and implant surfaces

A small product, with huge potential.

The root n' screw **brush**™ is a disposable rotary brush used at 200-600 rpm.

The bristles are made of nylon and brush head has a diameter of 2 or 3 mm.

Target group: General dentist as well as specialists

Introduction: To support the introduction, we made special sample boxes containing 1 brush only. These sample boxes can be purchased at a highly reduced cost.

We suggest that you use these sample boxes for:

- Your sales reps. to hand out
- Exhibitions; place the samples on the tables/counters in a large (glass) container or similar. All dentist could have a sample with short information, against filing in a contact form.

The product is available in the web shop www.cmsdentalshop.dk.

Find them under the category "Rotary perio brushes NEW".
